

EXPERIENCE

•Pointo

Jul 2024 - Present

Software Developer II - (Reactjs, Nodejs, NestJs, Typescript, Postgres, MySQL, AWS, Docker)

Onsite

- Developed real-time IoT details extractor with scalable and efficient architecture for battery which seamlessly fetch battery data for over **thousand of customers at a time**.
- Leading the software development team in building operational solutions using Express.js, Next.js, and Nest.js, optimizing sales, collection, and inventory management workflows across the organization.
- Developing an IoT data platform with real-time location analysis for lithium-ion battery fleet management, implementing real-time **BMS communication via CAN protocol** with **RabbitMQ to handle the huge volume of heartbeat data**.
- Managing comprehensive **AWS infrastructure (EC2, RDS, S3, SES)** while implementing **CI/CD pipelines** and infrastructure-as-code practices for reliable deployments.

•Mind Webs Ventures

Dec 2022 - Apr 2024

Software Developer I - (Django, Reactjs, Nodejs, HTML, CSS, JS, Typescript)

Remote

- Engineered an end-to-end application architecture, **optimizing APIs to significantly reduce time complexity** and enhance data retrieval speed, thereby improving overall system performance.
- Contributed to the development of an **Online Learning Management System**, focusing on achieving a **UI efficiency of 90%** to provide a **user-friendly and intuitive learning experience**.
- Developed an internal UI Library for React utilizing **Headless UI and Radix UI**, enhancing **code reusability and maintainability**.
- Created a secure **private community platform** tailored for students **aged 10 to 20**, fostering a safe and engaging online environment for educational interaction.
- Designed and implemented multiple screens across diverse industries, including eCommerce, Ed-Tech, and Fin-Tech, using Figma for both web and mobile applications.
- Led the development of a **dynamic sales module** for a **breed selling organization**, enabling **users to efficiently split orders** and manage breed deliveries on different dates.
- Worked on a Notification Management System to **efficiently manage notifications** using various providers, ensuring smooth communication channels.

PERSONAL PROJECTS

•Smart Refrigerator

Deployed link

React JS, Django, Machine Learning (Apr 2023 - July 2023)

- Spearheaded the development of a smart refrigerator device complemented by a website offering **personalized recipe suggestions** based on available vegetables stored within the refrigerator. Integrated an extensive recipe database accessible to authenticated users.
- Engineered a Smart Refrigerator solution employing machine learning algorithms for **automated detection of available items**, resulting in **enhanced efficiency** and convenience.
- Collaborated cross-functionally to seamlessly integrate **Django and React frameworks**, ensuring a cohesive and intuitive user experience across the platform.
- Achieved a **significant improvement** in detection **accuracy by 90%** through the successful implementation of advanced image segmentation techniques.
- Optimized resource utilization and **minimized manual effort** by automating item detection processes, thereby streamlining operations and enhancing overall efficiency.

TECHNICAL SKILLS AND INTERESTS

Languages: Python, JavaScript, TypeScript, HTML, CSS

Backend & Databases: Node.js, MongoDB, MySQL, PostgreSQL

Frameworks & Libraries: React.js, Next.js, Redux Toolkit, React Query, NestJS, Django

Cloud & DevOps: AWS, Docker, CI/CD

Tools: Git, VS Code, Figma

EDUCATION

•Bachelor of Technology in Computer Science and Engineering

Jul 2019 - Jul 2023

Government College Of Engineering & Textile Technology, Serampore

CGPA: 9.39
